EXPERIENCE

Freelancing — *Web Development*

May 2023 - July 2023

- Developed responsive landing pages with a focus on user-friendly design.
- Created dynamic dashboards for real-time data visualization.
- Collaborated closely with clients to meet project requirements.
- Built interactive web applications with React.js, Tailwind & MUI.
- Conducted testing and debugging for error-free user experiences.
- Notable Projects Links:
    - Landing Page UI
    - Dashboard Ui

PROJECTS

DevNexus — *Web Application*

- DevNexus is designed for web developers like you who want to take their projects to new heights. Our powerful features, components, and resources are here to supercharge your web development journey.

Expense Tracker — *Web Application*

- The expense tracker feature allows users to add their expenses and income, set a budget, and view a summary of their spending.
- This feature is useful for gaining insights into one's spending habits, making informed financial decisions, and improving financial management skills.

MovieX — *Web Application*

- MovieX provides a simple and convenient platform for movie enthusiasts. With a user- friendly interface.

Swiggy UI — *Android & IOS (Native App)*

- Designed and developed the user interface (UI) for a food delivery mobile application using React Native.
- Created engaging UI elements, including scrolling FlatLists, to showcase restaurant listings, menus, and order processing.
